

UI Reviews Summary - First Pass

UI - Modality Synchronization

Need to avoid panel collusion - see below for the symptoms.

Alignment

The space between the record entry and text tip (“Chase Bank” & “Approve....”) can be closer or if it is easier the tip can go above instead of below.

name	data modified	size
▶ Chase Bank	21 September 2021 at 19:24	1.8MB
Approve Precursor Order for Copy Machine for Building A	30 October 2021 at 19:24	1.6MB
...

Spacing

Let's reduce the spacing between elements in the navigation panel. And increase the indentation for each layer

▼ Pending Files

Chase

▼ Digital Vault

Images

The arrows icons (three types: asset - media icons, shortcut - hallow arrow, and taglet-solid arrow)

Advertise Panel Autosizing

Advertising Panels are not authorizing - when the display pane is on the bottom the operation panel is not expanded to take the full size, and the bottom is hiding off the screen.

Rename - Taglet to Tag (see Technical Debts to Address Section)

🔍 Look Up Taglet

New Taglet

Please enter a new taglet name:

Select Taglet type:

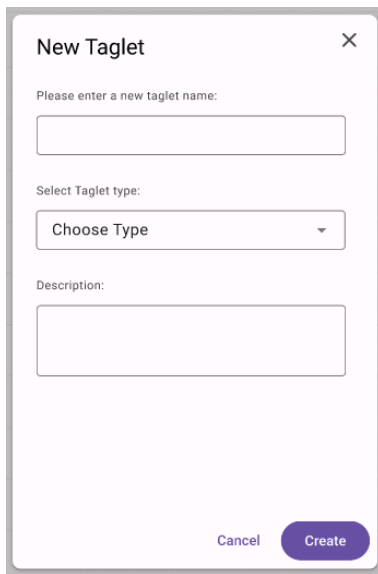

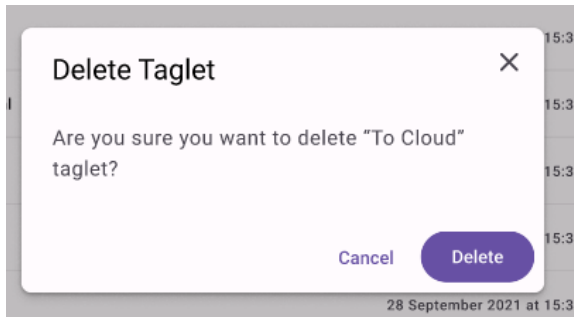

Taglet ▼

Description:

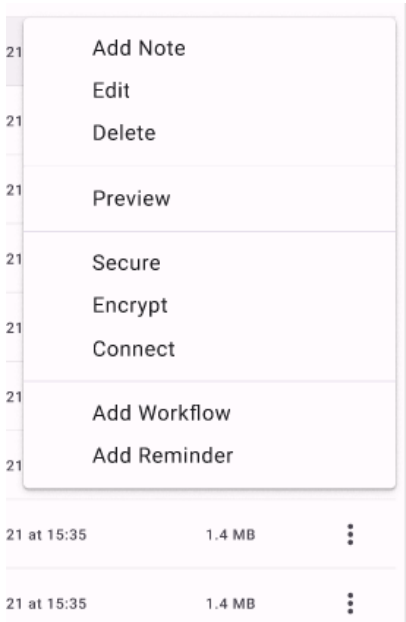

Missing UI's?

The top screenshot shows a mobile app interface with a 'Manage your Epax Users' header. A modal dialog titled 'Edit User Profile' is open, containing fields for User Name (Smith), Last Name (Doe), First Name (Smith), Password (masked with asterisks), and Email (smith@gmail.com). The dialog has 'Cancel' and 'Create' buttons. The background shows a list of users: Joe Doe, Jane Doe, and Smith Doe, each with a profile icon and a '1.4 MB' label.

The bottom screenshot shows a similar mobile app interface. A modal dialog titled 'Rename Taglet' is open, with a text field containing the word 'Utilities'. The dialog has 'Cancel' and 'Save' buttons. The background shows a list of taglets, each with a '1.4 MB' label.

The first menu items: Add Note, Edit, and Delete see clickable prototype

Need to start creating a design document to capture design and changes for testing and maintenance support.

- Testing Strategy
We need to establish a testing strategy and start implement the testing infrastructure.
- Architecture Design
