========================doctor======================================

1. printout form in edit diagnosis(new)

overview, diagnosis, pathology tests, radiology tests. prescriptions, patient admissions

total print

structure.doc has print layout

Please make print button for whole record

For now, system is showing same patient list to doctor1 and doctor2

it is not good.

Ans
add print button in all form and print the form in format

Details

Diagnosis Reports for every patient will be saved and allow to view at any time.

This is print out layout - THIS LAYOUT IS NOT COMPLETED

2. refer structure doc.(new)

It is a new one, and we just purchased all medical equipment for better tests but as you know, foreigners working here are kinda cumbersome

You understand what i mean.

They want to know everything in detail

Step by step

I do not even want to add price stuff on every page, but it is far better to finalize discussion at patient consultation stage

That is why i asked you of showing price at every category

Answer :::::::::

patient details page -> you can see several tabs : overview, diagnosis,vs, radiology tests. prescriptions, patient admissions

Dev

in every category, client want to show exact prices for every record with total prices.

so it can be printed out to document when using print out function.

Make sense?

3. case id

Your initial version had this case stuff, but i do not think it is necessary

Simple and precise ones are preferable

We don't want case id here

4. doctor1 -> edit bed assign -> why there is ipd patient?(fxiing) Structure Document. Doctor Module point 2

a doctor can not modify bed assigtn info.

Dev
for doctor don't have permission so he cannot modify this

(some explanation : infyhms product has ipd/opd functionalyt at first.
but our original dev removed that and made own logic so for now, we don't need ipd/opd string on our system)
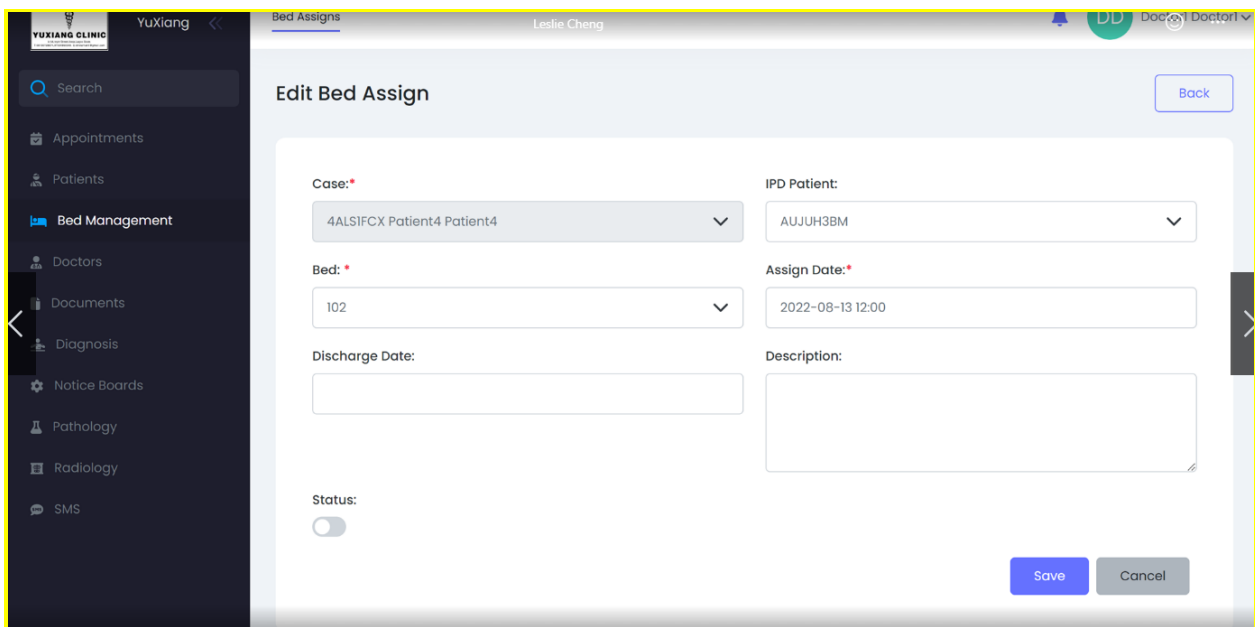

Just put patient name dropdown box who was required to admission instead of IPD patient

Let us leave 'Case' field

but you know, i can not find 'case' field in the super admin

I am going to use it

Because we need to put the case name like Covid, Hepatitis

Big case names will be there in order to differentiate in clear way

for IPD Patients

5. customer want manager (new)

Can't login from dismatch

Actually Manager is for viewing admin page without modification. So i can say it is same with admin which does not have modification. (Just for viewing)

So it is just for viewing purpose

So we have 3 directors in our company

Of course hospital is part of our business

And i want our directors view the work with manager right

Just for viewing purpose

Answer : ::: you will make manager role .

This will view only all pages on admin view.

it is same role with admin but not modification functionality. make sense?

6. for now, doctor1 is not ward doctor.(fixing)

but he can manage bed management

Ward doctor and Super Admin can manage them.

doctor1 is ward doctor, i tested it but how can i manage it like admin? i am not sure

I
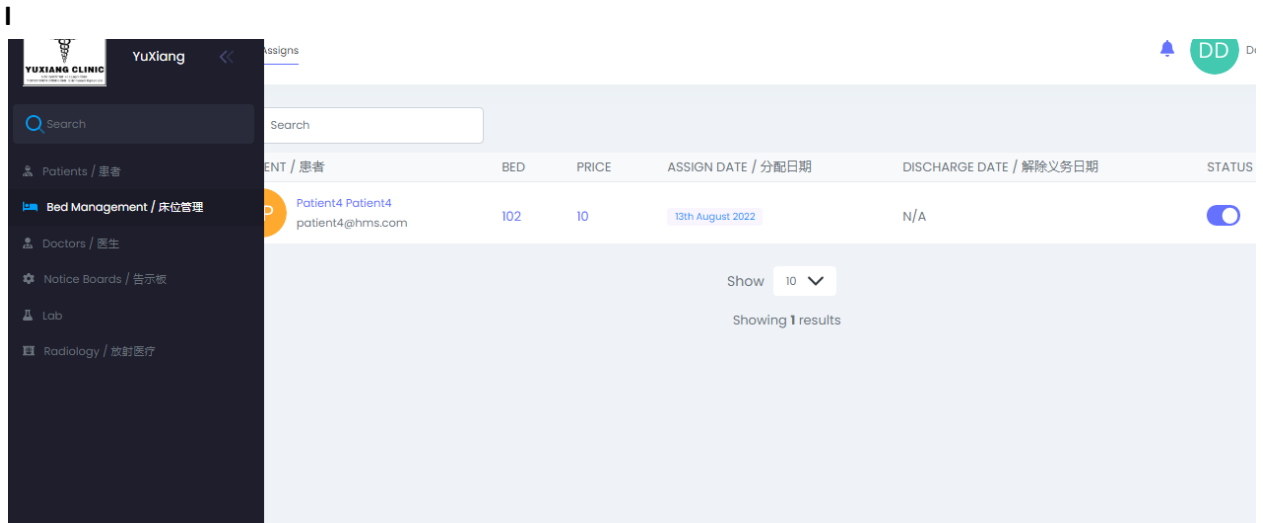

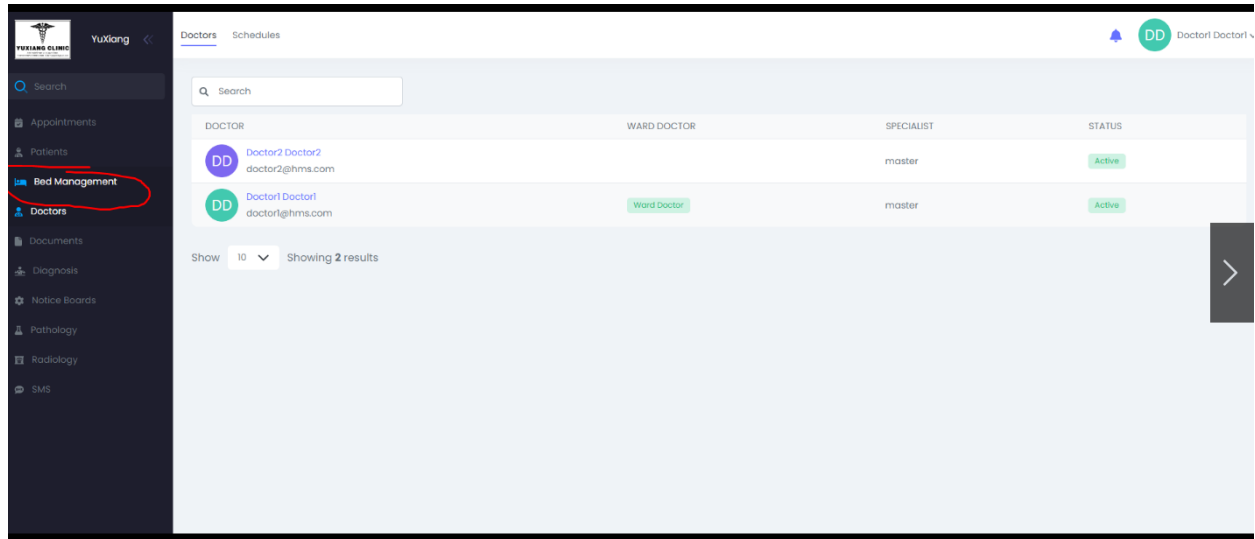

this is doctor1 login and click bed management/

When i click bed number and price number, it goes to server issue.

please let not click for it.

8.so therefore, we need to add prices on rooms too. (new)

9. in doctors / schedules / edit schedule : remove per patient time(new)
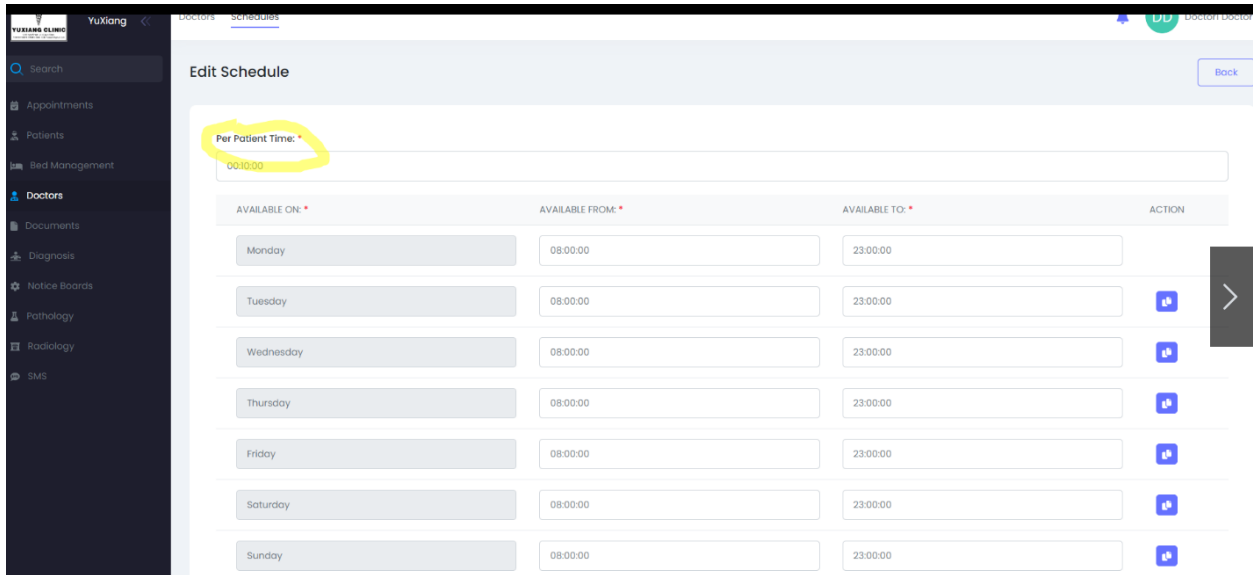

also admin pages, doctors / schedule, remove per patient time

10. error : at doctors/ schedules(fixing)

when click doctor name, it is going to sever error. It should show doctor profile as modal or new page
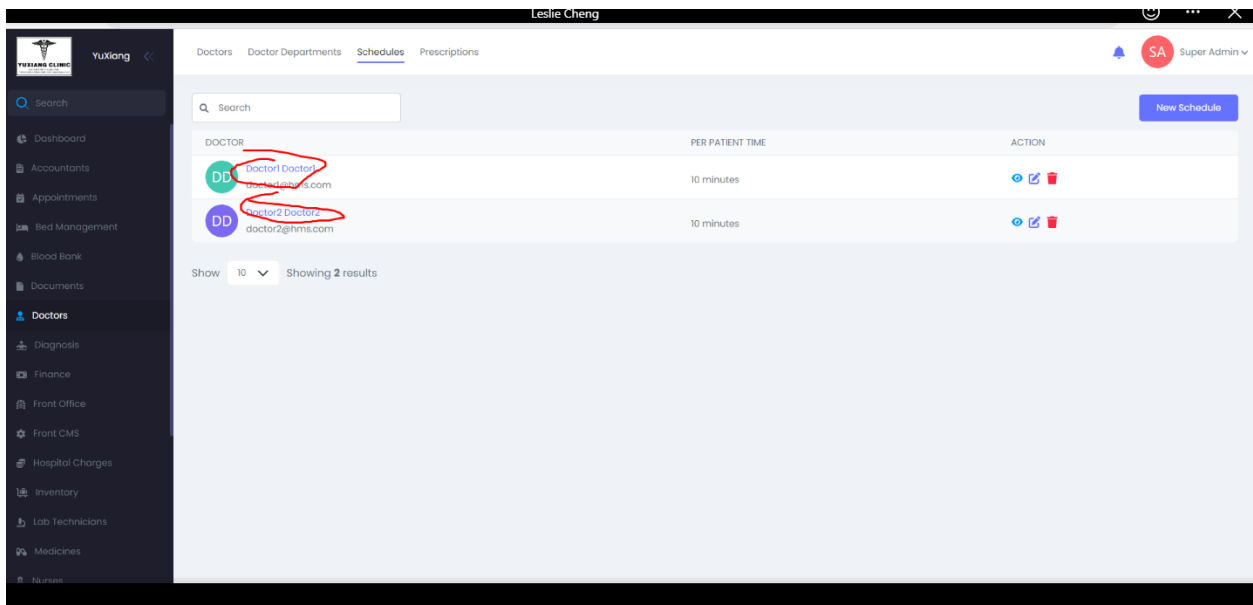

11. admin page, doctors /

remove prescription tab.(fixing)
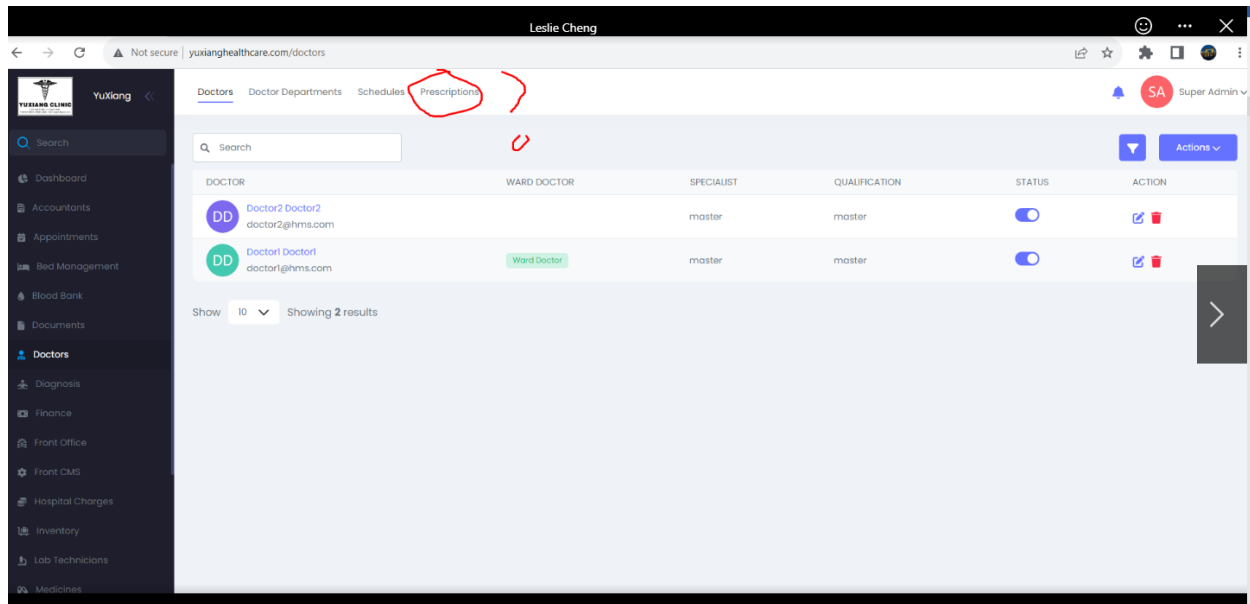

12. So documents and diagnosis will be removed

13. issue

admin can see every thing for notification.

but if receiption assign one patient to doctor1, it has to be shown on doctor 1

If it is doctor 2, then just to doctor 2

notification is working but whenever doctor 1 is login, he need to see his patients only.

i can't test this

Answer ::::::::::::::::::

Admin should be able to see all notification. it is right.

But when reception assign B patient to specific docor A, then this notification should be shown to only doctor A.

Make sense?

And when this doctor A login into board, he have patients record. then this doctor should see only his/her patient like patienret B.

Make sense?

14. notice board
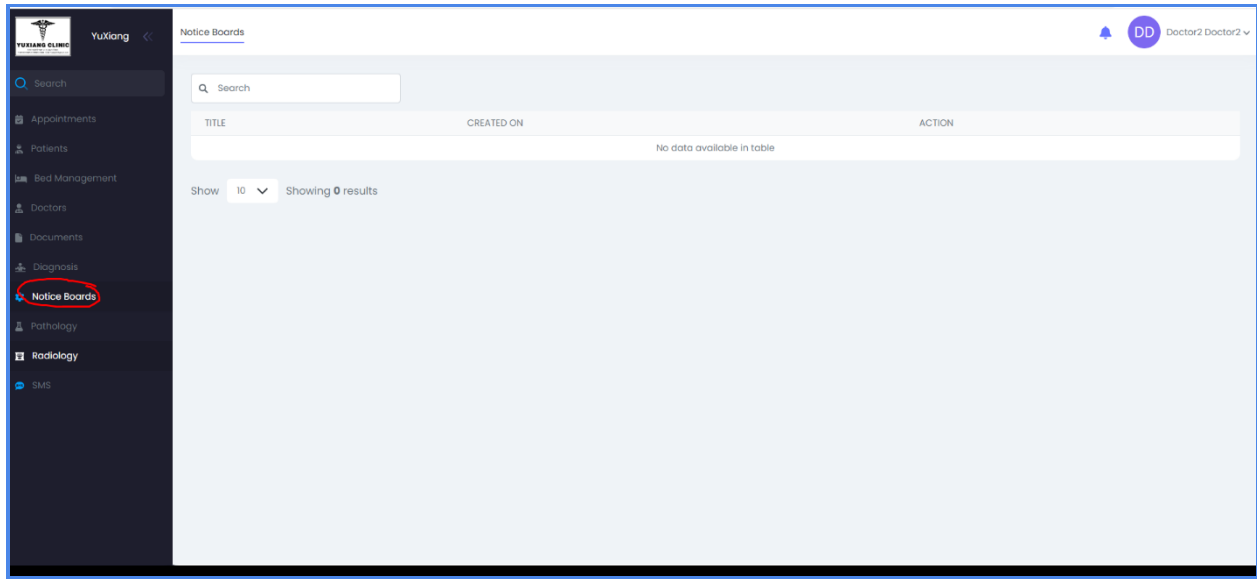

Let us make everyone (Admin, Doctor, Reception, Pharmacy...) can make notice boards

For instance,

there can me emergent situation at certain doctor's room which the doctor has to take certain measurement

in that case, doctor can utilize this notice board

One of the main reason is

also nurse work

You see, doctors have to give certain injection instructions and other administrative statements to nurses

In that case, doctors can upload notice through notice boards so that nurses can check the notice boards and follow

Answer :::::::::::::::::::::::::

For now, on template, only Admin can make notice boards , other role can't do it.

But we want to have functionality that everyone (Admin, Doctor, Reception, Pharmacy…) can make notice boards

Make sense?

i can't add notice in doctor role
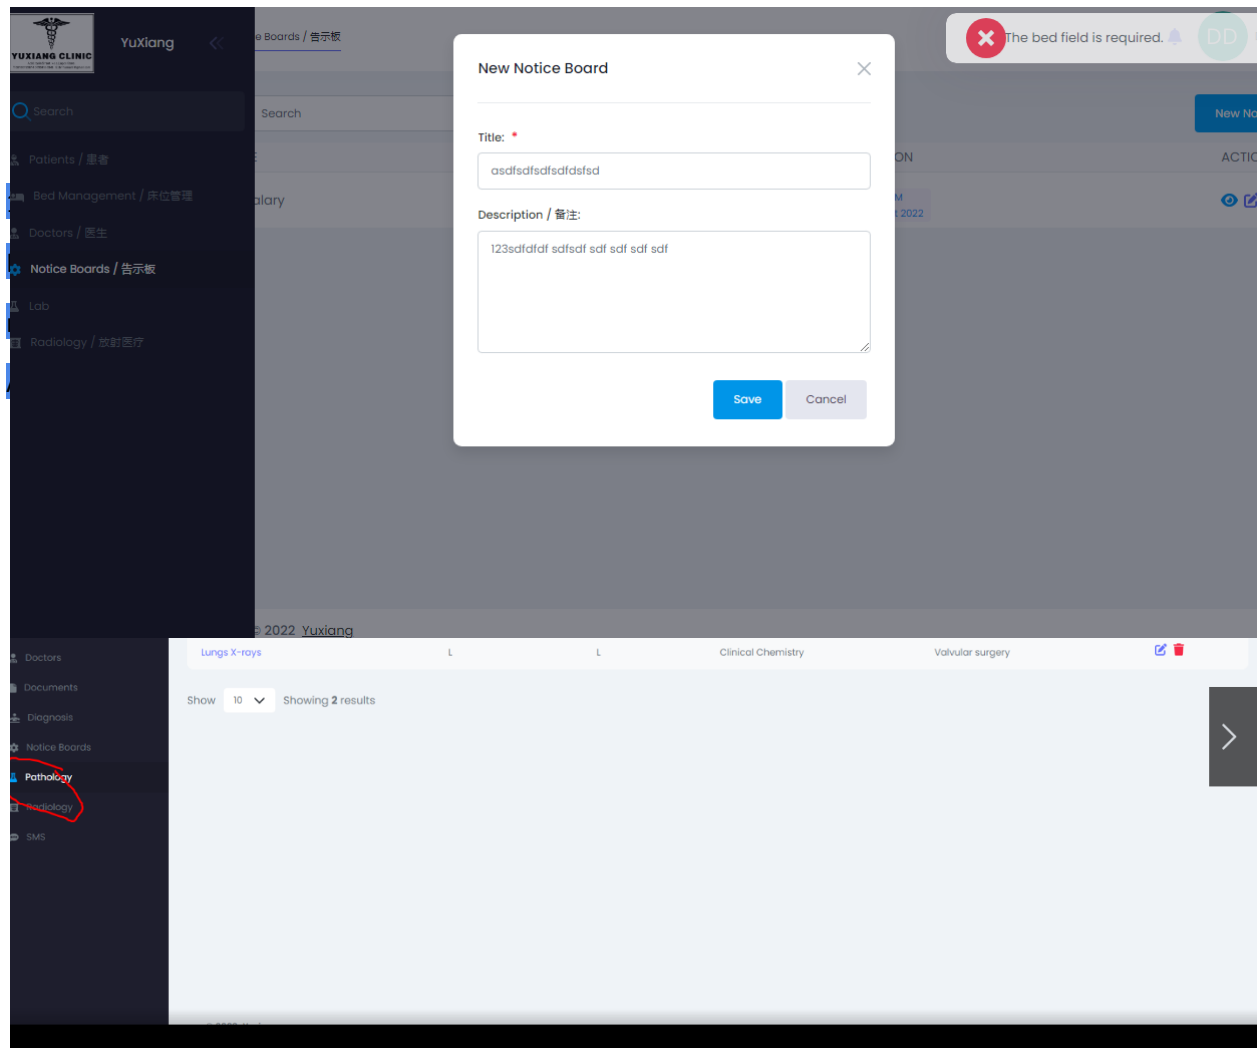

16. remove sms system

Remove sms. It is ok. We currently have sms system. We will use separately . And we do not even use that often.

17. we don't need appointments here.

=====================receptionist================

1. disable receptionist edit doctor's info when receptionist clicking doctor name in doctors. (Disable clicking red circles)
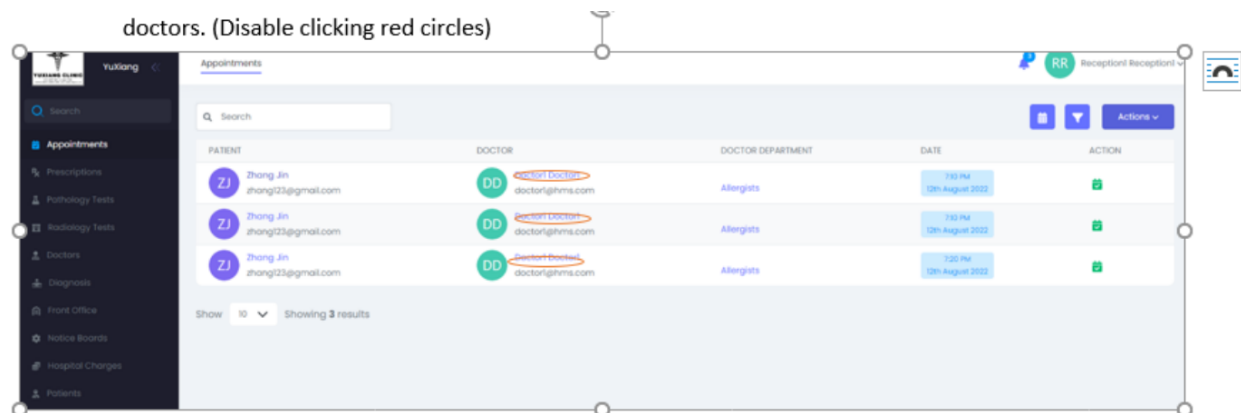

where is there no discharge for patient?

discharge is not same with hosptial charge please.

2.In Prescription, please make to show the price of medicines and add print out function. There will be 'Mark as being paid' and 'Print'. Print will be available once 'Mark as being paid'

There will be print out button mark as being paid

Prescription Details

Mark as being paid

N/A

3. In Lab (Let's change 'Pathology' into 'Lab') and Radiology Tests, please remove the red square function on the left side of table

only first line has calendar button, we have to remove that, bro.

Please show the prices of tests, subtotal and add print out function. There will be 'Mark as being paid' and 'Print'. Print will be available once 'Mark as being paid'

Print   Mark as Unpaid

Price: 1

CATEGORY NAME	TEST NAME	TEST NOTE

N/A

this all not done yet. all things are bug please see this

and still this calendar button are all here. check lab/lab tests and radiology/ radiology tests HUh~

Showing price and printing out (in Invoice form) is important

And talking about 'Mark as being paid', please make it available to set it back unpaid

4. remove daignosis and sms. front office, hospital charges.

hospital charges will be created and modified by admin

I noticed here that, hospital charges are not related with patients.

5. in receiption/ patient details should have also discharge info and hospital charge info and total sum info

Let me explain briefly. Some patients need to take operations in this case, we are going to add all our work names and prices on hospital charges, and doctor will choose at 'hospital charge' tag, and of course, the table will show similar to radiology tag table

Total invoice will show like this in red square Daily

Total invoice here means consisting of all prices above and including discharge, hospital charges

Hospital charge is daily for sure

For discharge, we can print out for discharge separately.

Total invoice here means consisting of all prices above and including discharge, hospital charges

Hospital charge is daily for sure

For discharge, we can print out for discharge separately.

all those 3 tabs should have print functionality als

discharge is just info when patient is going to discharge right?

doctor and ward doctor should update pay info for patient, so it will be handled in discharge info, right?

also admission pay info

6. **Hospital charge will be created and modified by admin, reception will just view it**

client wnat to show hospital charge in patient data.

Hospital charge will be created and modified by admin, reception will just view it

he want discharge, hospital charge , total invoice in side of patient admissions on patient details

Remove doctor OPD charge

Let me explain briefly. Some patients need to take operations in this case, we are going to add all our work names and prices on hospital charges, and doctor will choose at 'hospital charge' tag, and of course, the table will show similar to radiology tag table

total invoice is daily.

hospital discharge is daily

but discharge is not daily for patient

we can print out for discharge separately.

Answer ::::::::::::::::::::

In patient details page, we have several tab right now like overview, diagnosis, pathology tests, radiology tests. prescriptions, patient admissions

We want to have more tab like hospital charge , Discharge, and total Invoice.

hospital charge will be daily and there will be all records.

Discharge is not daily , there will be all records also for charge about patient.

total invoice is daily with record .

make sense?

10:53 AM

7. receiption can see only pathology and radiology. and pathology will be lab

============================pharmacist====================

1. remove sms

2. For doctors, just viewing not editing and updating

3. Prescription - just viewing. Disable mark as paid

they can know payment status

and they are allowed to release the medicines once the payment is done

Payment will be done at reception

receptionist will mark as paid

then it will show to the pharmacist

and phm will release the medicines to the patients

4. medicine

in medicines, it has buying price and selling price. Please show selling price on prescription at doctors and reception

And please add this function. Pharmacy releases prescribed medicines to patients and on the other hand, they also sell the medicines to the customers. We can add 'Customer' instead of 'Patient' but just sell medicines and print out invoice

5. remove lab and radiology.
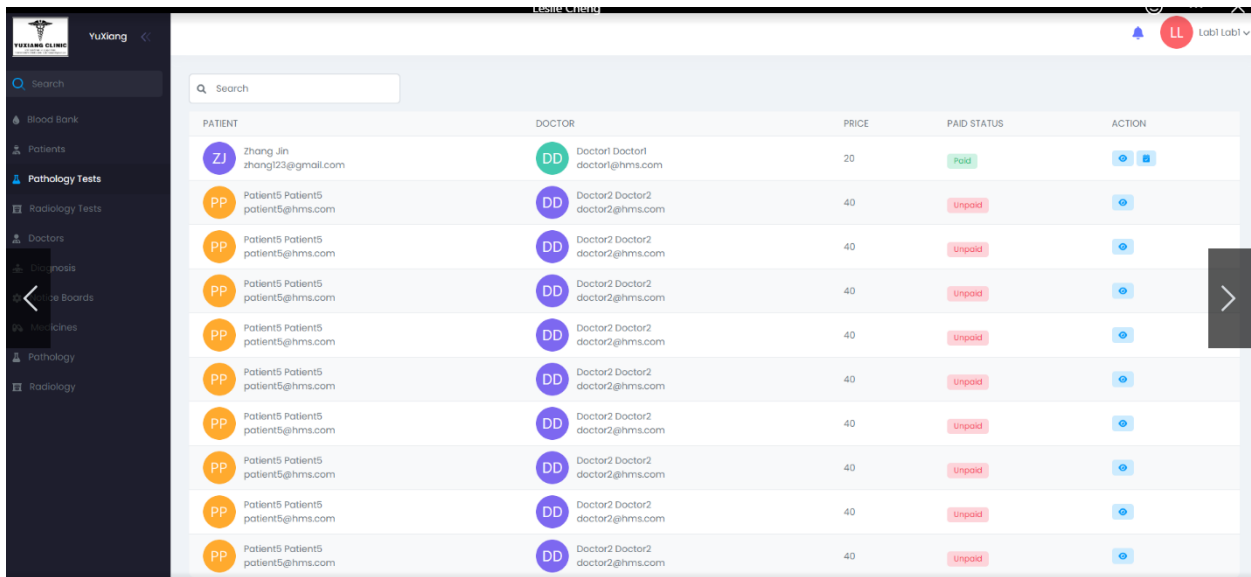

6. change patient to Customer and add this function

And please add this function. Pharmacy releases prescribed medicines to patients and on the other hand, they also sell the medicines to the customers. We can add 'Customer' instead of 'Patient' but just sell medicines and print out invoice

Jin ask to ignore this

==============================Lab=======================

1.remove blood bank and patients.

2.when we write the test result with first record calendar button click, where is it saved for test result?

the calendar button show when the record payment status is paid
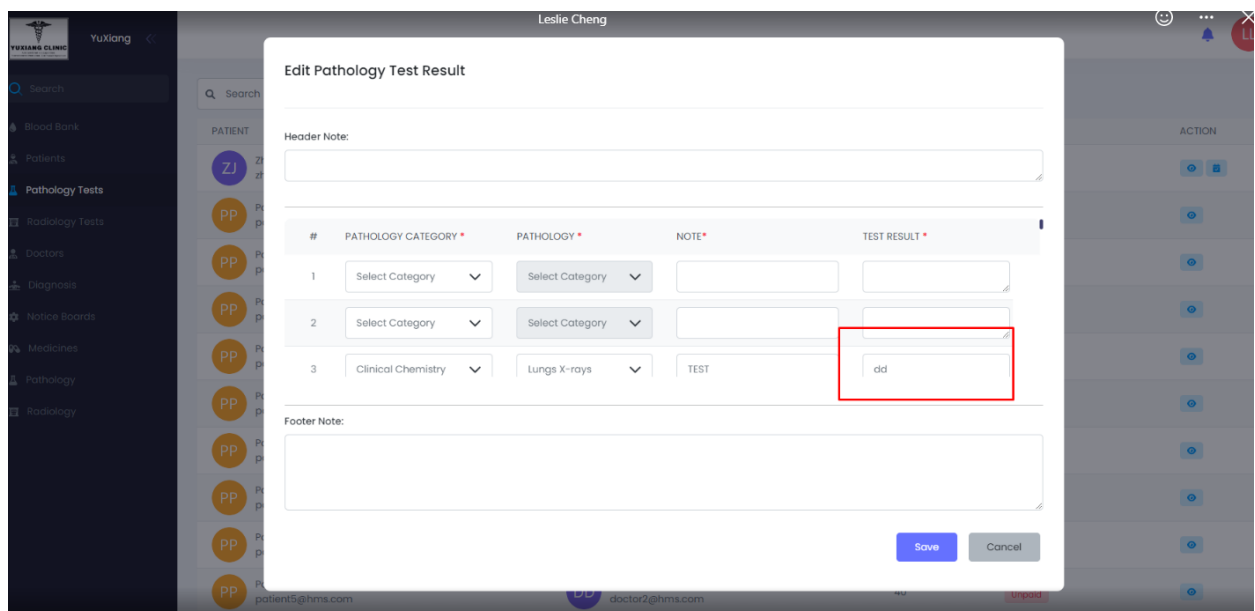

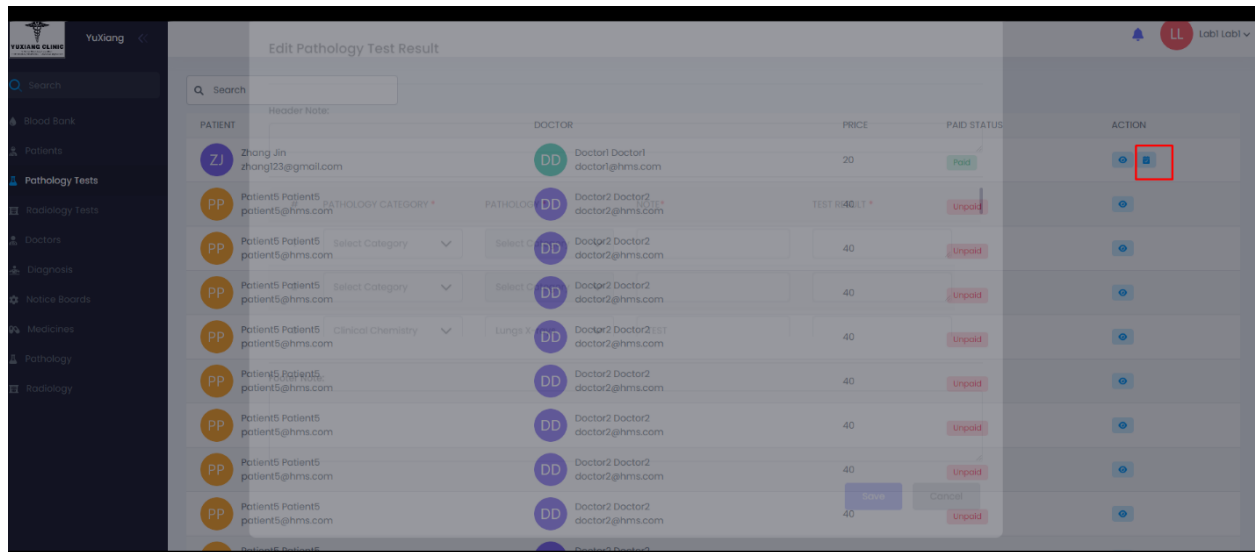

can we show it in table also? so that doctor have the reference.

and patient data has not column also for test result. we want to show it in patient pathology test.

I am asking you as it has this field. Of course it will be better to view the result

so that doctor can have the reference

3.remove doctors and diagnosis, medicine.

================================nurse================

show doctors and notice boards.

only viewing doctors.

================admin==============================

1. On dashboard, let us show Total Income, Daily Income, Lab Test Income, Radiology Test Income, Pharmacy Income, Hospital Charge Income,   Doctors, Patients, Nurses, Available Beds

2. Remove Accountant

3. in bed management

Why is 'Available' Tag row showing No ?

If it is vacant bed, please show green light,

If it is occupied, red light please
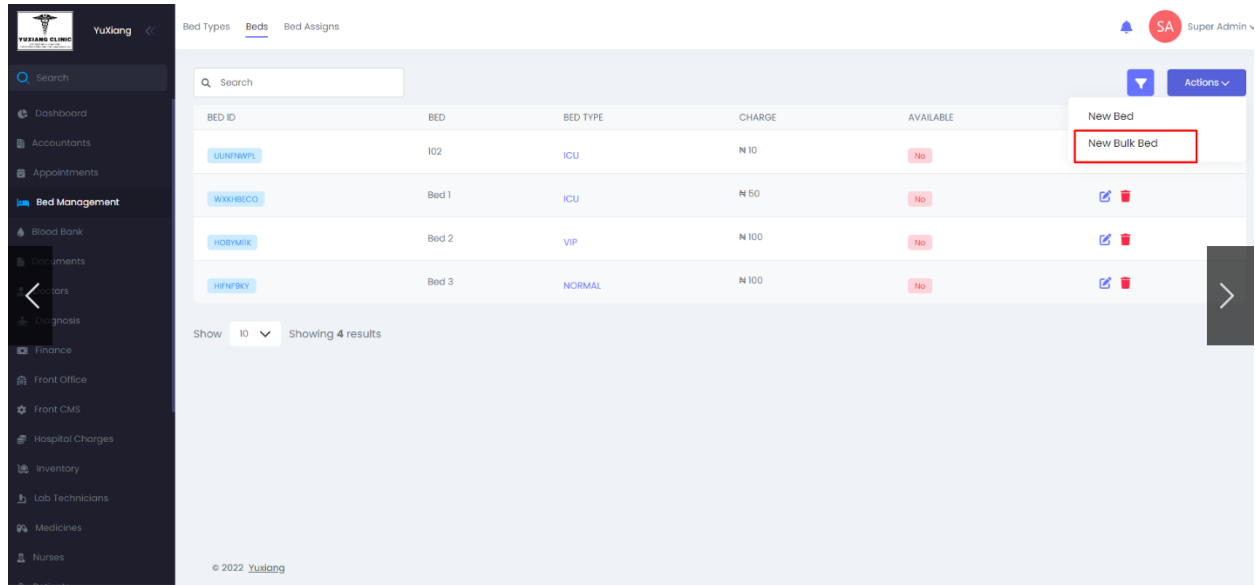

and filter icon clicking bring new buil bed. remove it.

Remove Bed ID and Case ID

4.Remove blood bank

Remove documents and diagnosis

5.Remove Front Office

Front CMS is ok

6. For hospital charges, I think we already made clear for it in receiptionist.

7. finance

Please show incomes - Total Income , Radiology Income, Lab Income, Hospital Charges Income, Discharge Income, Pharmacy Income due to daily basis which can be exported to Excel file

Dev Comment
discharge income is basically the test income which is already showing so we are not showing this

8. inventory

==- in issued items, remove user type==

==-The record of Issuer and Issued by must be showing as long as we don't have in files or saves, or we can add view (eye icon) function==

==9. Pathology to Lab (Name change). This is stated earlier==

==10. SMS/Mail will be removed==

And Chinese language is not fine in this system, so we can add Chinese names next to English names. For example, Doctors/医生

I will send you the list of names in Chinese by early next week

FEEDBACK

- Receptionist
  - Where can we add new patients?
  - We can not find new patient registration function
  - Print preview page is not showing well in Radiology, Lab Tests and Patient data.

  - Word Correction - Radiology Test
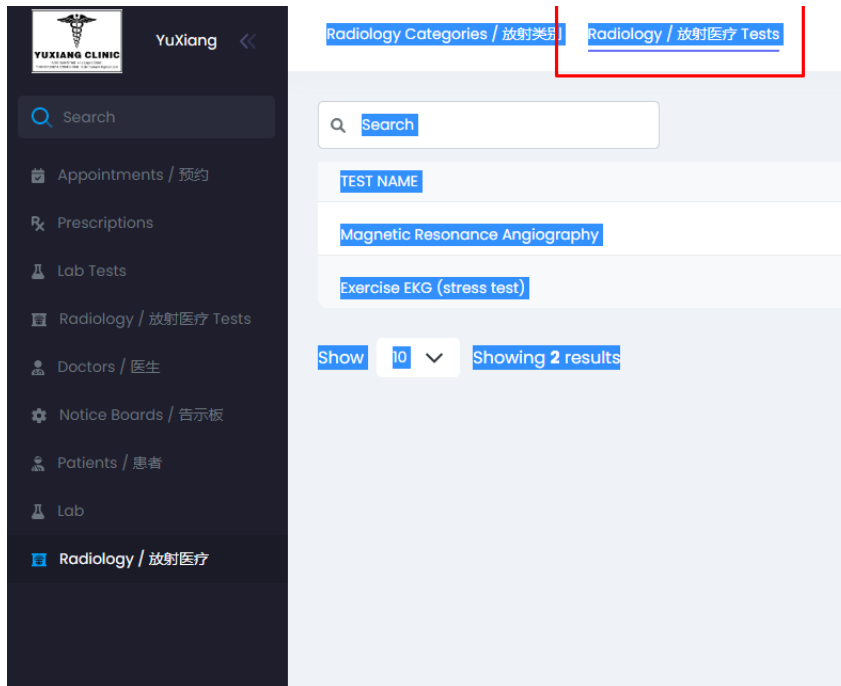

* After creating a message on the Notice Board in Reception, doctors can not see the Notifications.

   * Patient dedication is also not showing on Notification

   * In Hospital Charges, we need to see charge category and charges' data we created in Admin.
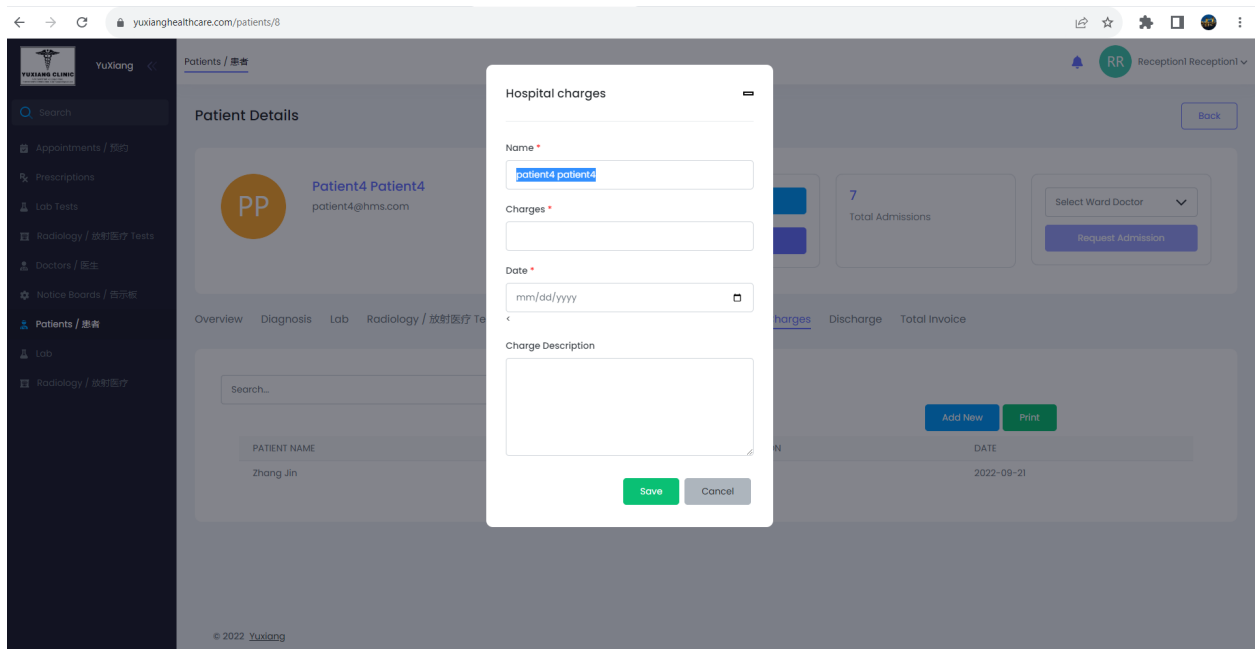

- ADMIN
● We can't create Category in Admin function
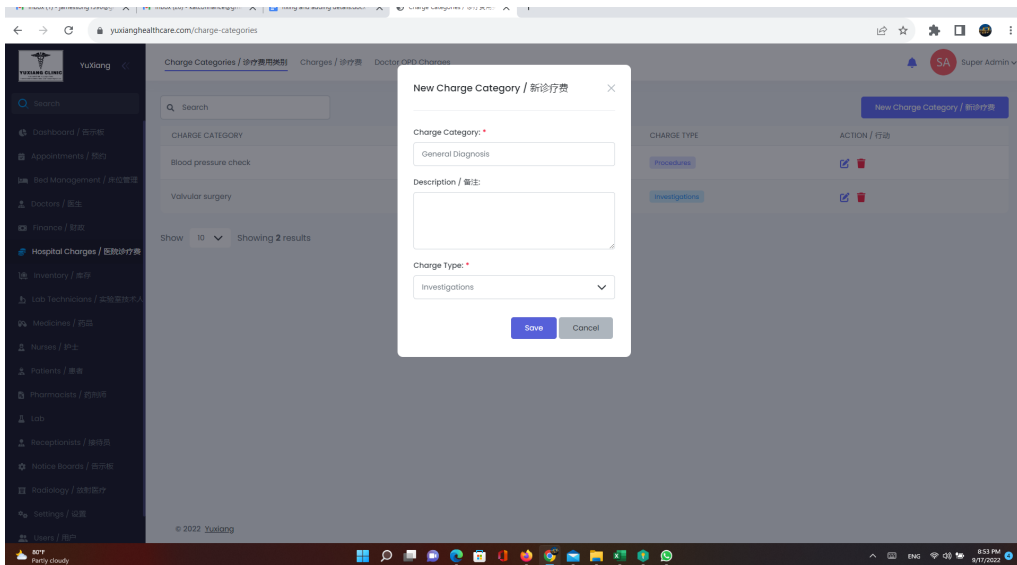

● In Hospital Charges, we can't create 'New Category"
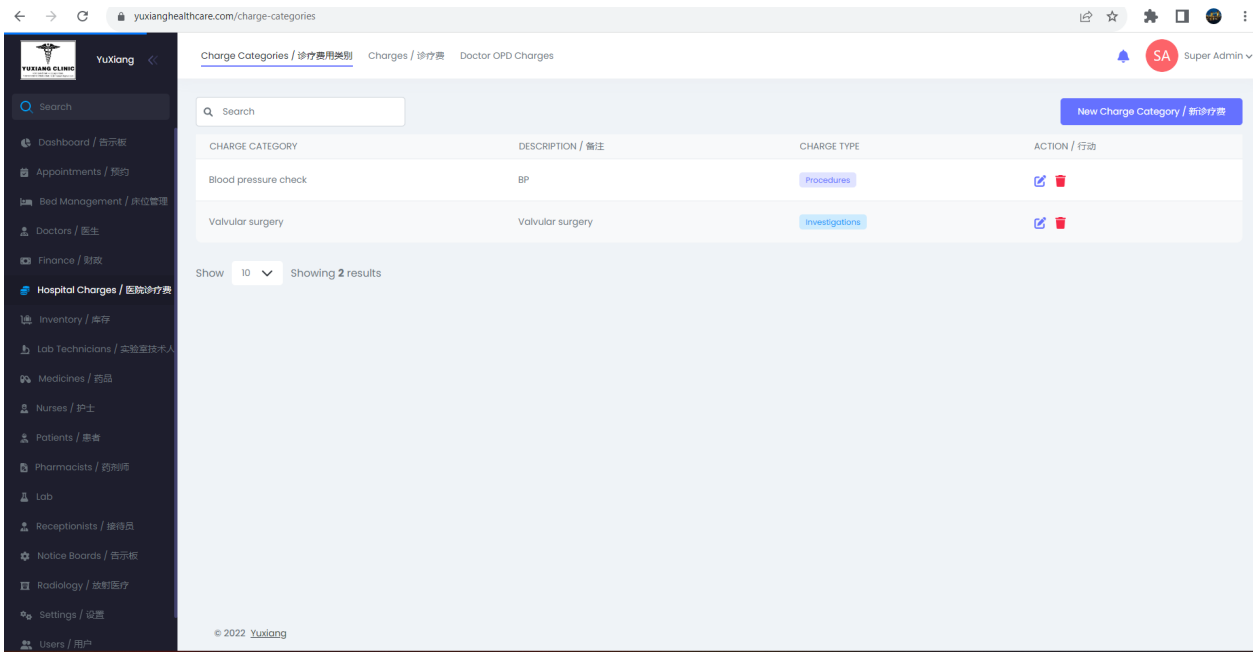

● In Charges, remove Charge Type. New Category list is not showing as we can't create New Category

- And this Hospital Charges must show at Doctor
- In Radiology Test, we can remove Charge Category and Report Days. Standard Charge must be inputted. (Current Standard Charge Field is being affected from the Charge Category)

- In Lab, we can't see New add function while Radiology has.

- Super Admin must view all functions (like the one below in Reception). For now, Admin can't view the page below.

- LAB
● Once we click 'mark as being paid', it leads to 403 error and the screen also gets paused (can not close)
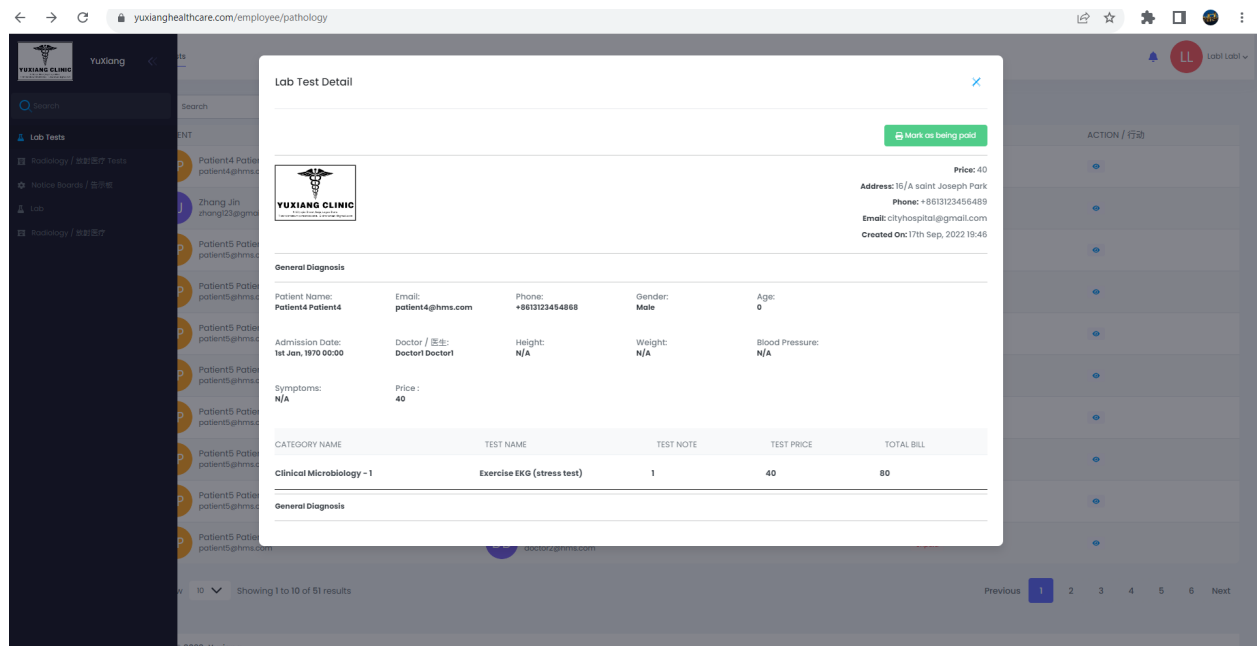

● And for patient 5, we can not check 'Action'. Once we click it, nothing shows on the screen.
● And how can we input the record for the patient test data and print out? (for both Radiology and Lab)
● Where can we see the test result?

-
-
-
-

Jin, 12:57 AM
you want to show it also in list? ☺

When we write the test result. where is it saved?

12:58 AM
I am asking you as it has this field. Of course it will be better to view the result
so that doctor can have the reference

Jin, 12:59 AM
it will be passed to patient pathology tests. ☺

1:00 AM
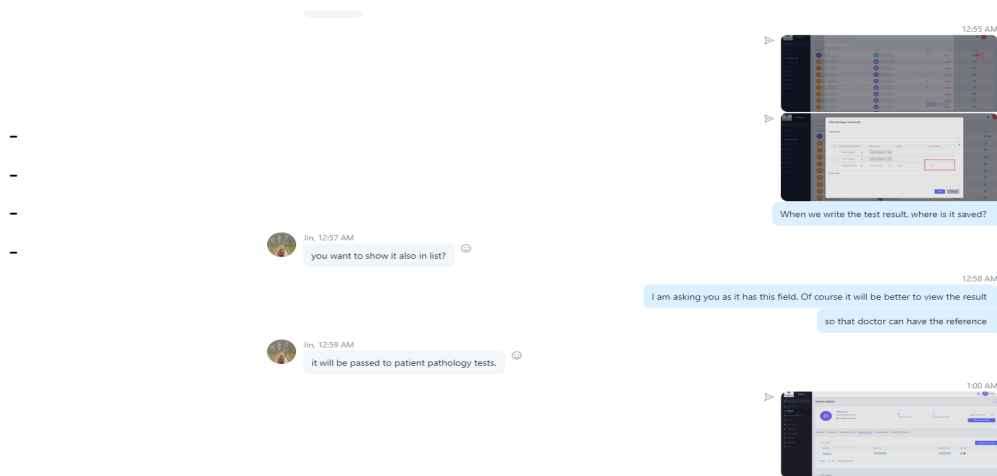

- Pharmacy
● In Medicines / Medicine Brand,we don't understand why we have phone number and email here

● In Customers / Sell Medicines, we can't see Quantity, Total Price, and Print functions.

- Doctors
● Where did the prescription add go while the others have add functions? We have to add prescriptions (Medicines) and Pharmacy medicine list and price will show so that doctors can add medicines in the fields whatever they acknowledge as necessary for the treatment.
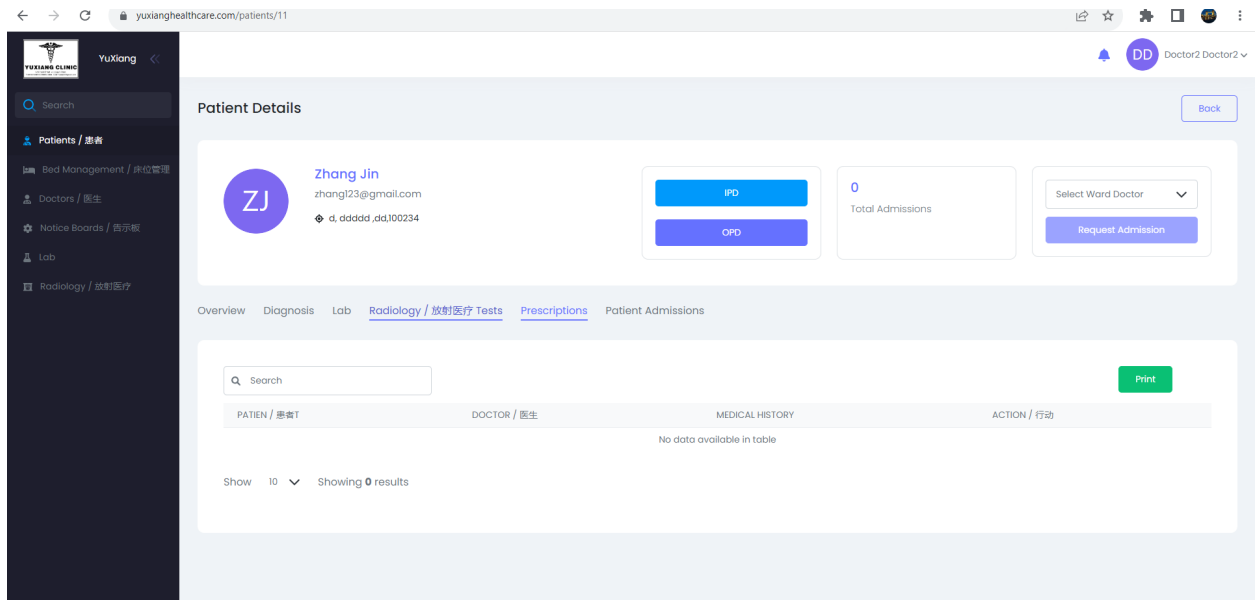

- And Where did the **Hospital Charges** go and **Total Invoice** go?
- And for Lab and Radiology, once we requested certain tests to Lab and Radiology Departments, how do we get the feedback from them? (No Data is coming in)
- Why do we have this Add function here while Lab doesn't have, please… Remove please.
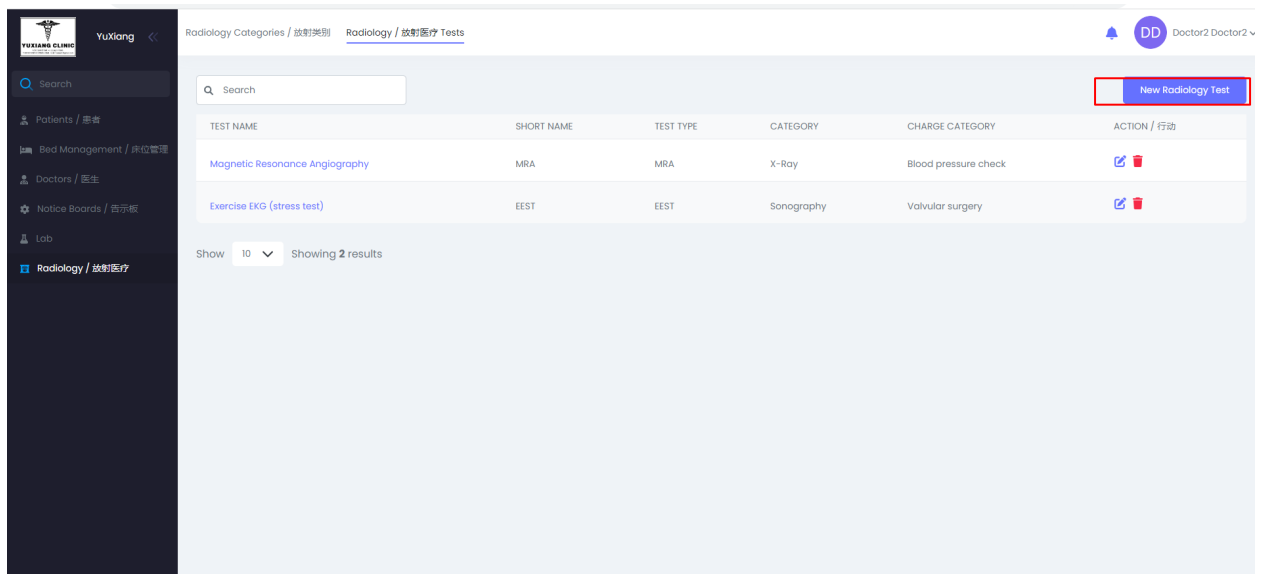

- You only made this function in Reception.

  We already discussed it
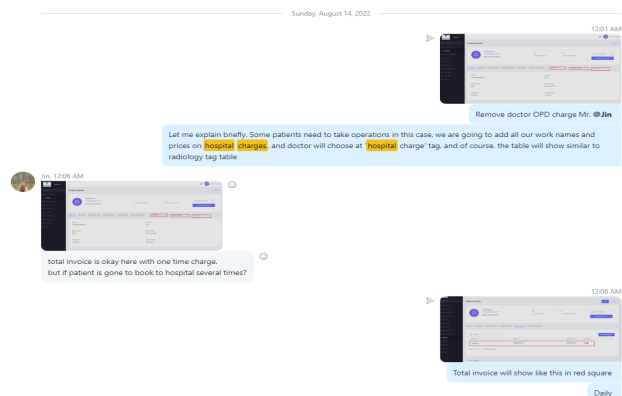

- Nurse
- We can't see the Nurse function.
